<p>Note: If you like small lines, you can substitute 1/4" tech lines (eg., Amsteel) for the 5/16". Also, you may prefer a smaller line for the mainsheet. The small tech lines do not stretch and do not absorb water and run easily, but are harder on bare hands and MUST be whipped or the core will protrude from the sleeve. Matt likes them better, particularly on the traveler, and likes wilder colors too :), but above are John's sound recommendations.</p>
